2026/2027 SYLLABUS DISTRIBUTION

SUBJECT: Mathematics **GRADE: 3**

Term 1

1. Introducing Negative Numbers

- a. Count on and count back in steps of constant size: 1-digit numbers, tens, hundreds or thousands, starting from any number, and extending beyond zero to include negative numbers.
- b. Read and write number names and whole numbers greater than 1000 and less than 0.
- c. Understand the relative size of quantities to compare and order positive and negative numbers, using the symbols $=$, $>$ and $<$.

2. Patterns and Sequences

- a. Recognise and extend linear and non-linear sequences, and describe the term-to-term rule.
- b. Recognise and extend the spatial pattern of square numbers.

3. Place Value and Rounding

- a. Understand and explain that the value of each digit in numbers is determined by its position in that number.
- b. Use knowledge of place value to multiply and divide whole numbers by 10 and 100.
- c. Compose, decompose and regroup whole numbers.
- d. Round numbers to the nearest 10, 100, 1000, 10 000 or 100 000.

4. Factors and Multiples

- a. Understand the relationship between multiples and factors
- b. Use knowledge of factors and multiples to understand tests of divisibility by 2, 5, 10, 25, 50 and 100.

5. Reading and Recording Time

- a. Read and record time accurately in digital notation (12- and 24-hour) and on analogue clocks.
- b. Interpret and use the information in timetables (12- and 24-hour clock).

6. Time Problems

- a. Understand the direct relationship between units of time, and convert between them.
- b. Find time intervals between different units:
 - i. days, weeks, months and years
 - ii. seconds, minutes and hours that do not bridge through 60.

7. Tessellation, Symmetry and Reflection

- a. Investigate what shapes can be made if two or more shapes are combined, and analyse their properties, including reference to tessellation.
- b. Identify all horizontal, vertical and diagonal lines of symmetry on 2D shapes and patterns.
- c. Reflect 2D shapes in a horizontal or vertical mirror line, including where the mirror line is the edge of the shape, on square grids.

8. Area and Perimeter

- a. Estimate and measure perimeter and area of 2D shapes, understanding that two areas can be added together to calculate the area of a compound shape.
- b. Draw rectangles and squares on square grids, and measure their perimeter and area. Derive and use formulae to calculate areas and perimeters of rectangles and squares.
- c. Estimate the area of irregular shapes on a square grid (whole and part squares).

9. Recognising and Building 3D shapes

- a. Identify 2D faces of 3D shapes, and describe their properties.
- b. Match nets to their corresponding 3D shapes.
